SUMMARY

I am a results-driven Web Developer focused on creating modern, dynamic web experiences. I specialize in interactive design, client-side validation, and user engagement techniques. I'm currently enhancing my portfolio with animated skill bars, habit trackers, and interactive pricing tables to showcase my advanced technical expertise and front-end proficiency. I take pride in having a positive attitude, being easy to work with, and quickly adapting to new environments. I'm also highly teachable and always eager to learn from others. I'm seeking opportunities where I can apply my innovative design and development skills to contribute to impactful web projects.

WORK EXPERIENCE

OJT at DENR-CAR Regional Office.

- I completed my On-the-Job Training (OJT) at the Department of Environment and Natural Resources (DENR), where I gained valuable experience in encoding and updating the e-DATS system. During my time there, I was able to effectively address and fulfill client needs, earning recognition for my strong performance and attention to detail. I consistently delivered high-quality results and maintained a commitment to accuracy and efficiency in every task. My experience also helped me develop strong client service skills and a professional work ethic that I continue to carry forward.

Construction worker (laborer)

- I also have experience working as a construction laborer, where I handled a variety of hands-on tasks such as site preparation, material handling, and assisting skilled tradespeople. This role strengthened my ability to work in physically demanding environments while staying focused on quality, teamwork, and safety. I take pride in being dependable, hardworking, and fully committed to getting the job done right.
-
